

## **Free On-Site Technical Assistance: Integrating Oral Health into Primary Care**

**Have you completed the EPSDT fluoride varnish application training and passed the online assessment?**

The DC Pediatric Oral Health Coalition technical assistance program can assist primary care providers and their staff with implementing fluoride varnish into well child-care visits by providing tips and tools on how to integrate oral health into patient flow.

- ✓ Understand the importance of oral health screening in medical practices
- ✓ Provide counseling and anticipatory guidance to parents or caregivers
- ✓ Receive tips and tools for implementing oral health risk assessments into your practice
